

## WEEKEND ACTIVITIES AND SPECIAL EVENTS

### TRANSFORMERS ART

Gigantic installations produced by the Montenegrin artist Danilo Baletic with parts of cars and lorries found in waste fields. The first exhibition in Italy featuring eight enormous metal sculptures inspired by the famous Transformers, robotic aliens that become means of transport.

The exhibition is curated and promoted by Baha Fine Art.

### MUSEOESTATE - MUSEUMSUMMER

JUNE 20 - SEPTEMBER 10

During the summer, the Museum is open from Tuesday to Friday from 10 am to 6 pm, on Saturdays and Sundays from 10 am to 7 pm. Scheduled guided tours, activities in interactive workshops and special events for visitors of all ages and from all over the world.

### MEET ME TONIGHT 2017

SEPTEMBER 29 • FREE ENTRANCE FROM 6PM TO MIDNIGHT

For the European Researchers' Night the Museum organizes a special evening with workshops, interactive activities, meetings and conferences with protagonists from the world research. Meet over 100 researchers, experience our interactive workshops and tours, witness extraordinary art performances and explore the exhibitions and galleries.

The themes of the meetings range from the world of making to that of media technologies, from economy to society, from space to Space to particle physics, from health to medicine, to nutrition and sports.

## EXHIBITIONS

### 100 TIMES IN TOUR

UNTIL SEPTEMBER 3 • OLONA BUILDING

A travel around the 100 editions of Giro d'Italia to discover the history of two-wheeled vehicles, from early models to modern racing bikes. On exhibition the most interesting bicycles of the Museum collection.

IN THE CONTEXT OF: **GIRO CENTO, AMORE INFINITO!**

## FANTASY

JULY 4 - AUGUST 31 • SALA CENACOLO

On show the paintings by Nini (aka Nie Jingjing), a young Chinese artist representative of Chinese Abstract Expressionism. The paintings are dedicated to themes and stories filtered by emotion and by artistic practice, in which the joyful and emotionally positive gesture (fancy) puts on canvas historical concepts, places and fictions. In all her works, ironic and conceptual elements mix with the Italian geographic locations visited by the artist..

## THE LITTLE LADY OF MILAN. A RESTORATION ON SHOW

Come and witness the restoration process of the "Donnina di Milano" (The "Little lady of Milan" or "Little Angel"), a sculpture by Marino Marini created between 1932 and 1933 and documented in the 1950s and 1960s in a famous reportage by photographer Mario De Biasi.

The project, funded by the Atlas Foundation, involves the Municipality of Milan - Museo del Novecento, the owner of the sculpture, and the Museum that for many years has been conducting special restorations thanks to its restorers in residence - the "Strati group".

The Project involves also: the University of Milano-Bicocca leading the scientific studies; the Expotrans company for transportation; the Ministry of Cultural Heritage and Activities and Tourism with its preservation function; the Marino Marini Foundation for the evaluation of the consistency of the restoration.

In a dedicated area of the Museum you can see restorers at work and discover more about the project.

## MINIMAFORMS: PET 2.0

Pet 2.0 is robotic creature. Its behaviours evolve through the interaction with viewers and they are communicated through movement, sound and light. Pet 2.0 is like a house pet: it stimulates curiosity, play and the exchange of emotions between man and robot. It is part of an on-going research exploring our emotional relationships with intelligent machines. The installation is part of the educational project Make your Tech, funded by CISCO Foundation. The goal is to explore the use of electronic media and open source technologies such as creative and expressive tools, working at the intersection of art, science, technology and design.

## MY PLANET FROM SPACE. FRAGILITY AND BEAUTY

A touching exhibition curated by Viviana Panaccia and promoted and organized by ESA [European Space Agency] in collaboration with ASI [Italian Space Agency] and the European Commission. The exhibition presents beautiful satellite images, space portraits of the Earth and of its different environments: "Ice", "Water", "Forests", "Agriculture", "Cities", "Atmosphere" and "Deserts". The photographs show some of the most beautiful and remote places of the Planet, showing how scientists study and control the health of the globe. Video-installations and info graphics complete the exhibition.
