BEATING WINGS

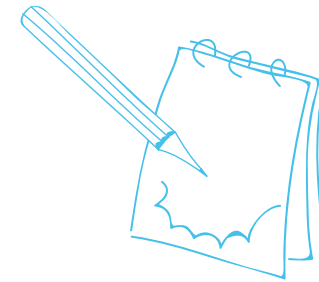

CURIOUS FACTS:

Leonardo was really good at drawing. He used drawings to express his thoughts and ideas.

Sometimes he created new projects, others he copied existing machines to represent the way they worked or he tried to improve them. During his studies on flight he designed the beating wing, conceived as a device to lift weights.

AT THE MUSEUM:

Complete the drawing on this card to create a new invention. Imagine what it could be used for and name it as you wish.

AT HOME:

Draw half of one of your toys and ask a friend to complete it as he/she wishes. How many new devices are you able to imagine?

my own invention:
