## MUSEUM IDENTITY

Founded in 1953, we are now the largest science and technology museum in Italy.

Housed in an early 16th century Olivetan monastery we collect and exhibit objects, machinery and evidence that retrace Italy's scientific and technological development.

All our educational activities are based on direct involvement and exploration through exciting and fun experiences.

Our aim is to help people develop an interest in technology, share our passion for science and support the discovery of a fascinating past.

We are a centre for debate and research, a lively meeting place and an active test lab for innovative educational and cultural projects.

### PARTNER INSTITUTIONS

### DIGITAL PARTNER

**SMQ SURFACE** 50,000

**OBJECTS** 16,000

**EXHIBITIONS** 36

**LABS** 14

**EDUCATIONAL ACTIVITIES** 155

**LIBRARIES** 2

## MUSEUM FOR ALL

Discover the new areas dedicated to nutrition, particle physics and Space, as well as the most important collection of da Vinci machine models.

Explore the collections on transport, materials, energy, communication and on the new frontiers of scientific and technological research. Take part in a workshop and let your imagination run free in our Tinkering Zone.

See unique examples of our country's industrial transformation such as the Falck laminator and the Regina Margherita power station.

Admire the deck of the Conte Biancamano liner and the famous AC72 Catamaran Luna Rossa. Get on board the Enrico Toti submarine and experience the thrill of a sailor's life.

Visit one of our temporary exhibitions and take part in science events to have your say in current debates.

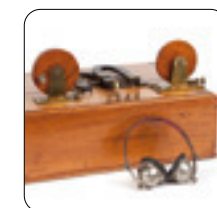

## MUST SHOP

Exclusive museum creations, gadgets and merchandise, books and dvds, games and science kits. Find new ideas and original products linked to science and technology. The Museum invests sales profit to fund new educational projects.
